

Rise Vida Profiles & Mentoring Program Info

The first program that I want to create is "MBV Cohort II" – all of the students that would sign up would be in this program

Somewhere in the UI there needs to be a section about the mentorship program and also in the profile there should be an attestation or something saying that either the mentor or mentee/student understands what is expected and what is not allowed:

MBV Cohort II Mentorship Program

The **MBV Mentorship Program** connects veterans and transitioning service members with experienced professionals who offer perspective, guidance, and encouragement as they navigate the next phase of their careers.

Each mentor will be paired with one or more MBV students in **Fall 2025**, with the mentoring relationship continuing through **graduation in May 2026**.

Program Philosophy

The purpose of the MBV Mentorship Program is to help veterans pursue *meaningful* career paths that align with their values, strengths, and aspirations. Mentors play a vital role in helping students reflect deeply on what matters most and make informed choices that support long-term success and fulfillment.

Mentor Commitment

Mentors and students should plan to meet regularly throughout the academic year, either in person or virtually, for conversations lasting 30 to 60 minutes. The frequency of meetings may vary based on schedules and mutual availability – ideally bi-weekly to monthly. These interactions are intended to foster learning, reflection, and professional growth through shared experience and dialogue.

Examples of Mentorship Topics

- Clarifying personal and professional goals after military service
- Exploring career paths and industries aligned with individual strengths
- Building professional confidence and communication skills
- Strengthening networking approaches and personal branding
- Navigating organizational culture and civilian workplace dynamics
- Discussing leadership, growth, and long-term purpose

What the Program Is Not

- Mentors are not responsible for securing jobs, internships, or interviews for students
- Mentors are not expected or required to open their professional networks or make introductions
- The program is not a transactional exchange or placement service

Program Expectations

All mentors participate on a volunteer basis. Students are expected to approach each interaction with professionalism, preparation, and respect for the mentor's time. The most valuable mentoring relationships are built on trust, consistency, and genuine curiosity.
